**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Applicant claims a composition comprising a plurality of structurally ordered nanostructures comprising group III-V, group II-VI or group IV semiconductors or alloys, wherein the nanostructures further comprise one or more alignment ligands associated with the nanostructures, and wherein a first alignment ligand on a first member nanostructure cross-links with a second alignment ligand on an adjacent member nanostructure, thereby structurally ordering the plurality of nanostructures in a polymerized matrix. Additionally, applicant claims a plurality of clusters of structurally ordered nanostructures dispersed in a matrix on a surface of a substrate, wherein long axes of the nanostructures are aligned substantially parallel to the substrate surface and wherein the matrix comprises alignment ligands cross-linking and orienting the nanostructures. The closest prior art, Lieber et al., U.S. Patent Number 7,211,464, teaches highly ordered nanowire structures wherein the longitudinal structures are disposed parallel to the surface of the substrate with the nanostructures being in elongated clusters wherein the clusters are dispersed in a matrix so as to align the structure in the parallel direction of the substrate. Lieber fails to teach the ligands cross-linking and orienting the structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1794
